The design bible's own entry for v11.310

v11.310 — 2026-10-24

A daemon carried can evolve away (C-184, T-448, T-455)

- *9.26 (the user)*: **a daemon on the companion evolves there by the game's own rules for level, friendship, the hour and WURMPLE's split** -- *never items or trades.* **The game finds it evolved and finishes it on load**: *stats, INDEX, ability, and the routines its new species learns offered the first time it is seen.*

The line that grows only while carried (C-185, T-450)

- *9.27 (the user)*: **HANDSHAKE → TETHERING → COROUTINE, a sugar glider; SIGNAL, SIGNAL, SIGNAL/STRATUM; stats 250/360/485.** *bond = steps/1000 (20 000 a day at most) + days carried × 5 + cares + goals together × 3;* `EVO_CARRIED` *at 60 and 160, never met on the cart; the first from the companion on the first goal finished while carrying, one per save; Gen 3's unused slots, INDEX 395–397, MISSINGNO to 398 (3.4 amended).*

One app, iPad first (T-453)

- *9.28 (the user)*: **one self-contained iOS app -- the game patched on the device from the player's own ROM and never bundled, the companion, the LIBRARY and the NOTEBOOK**; *INDEX cards coloured by type match with the understandings held.*

The landmarks drawn from the story (T-447)

- *9.29 (the user)*: **the buildings the story turns on get art of their own, inferred from the story, rather than a retint of vanilla** -- *two at a time, a sheet and a yes before each pair.*
