The engine since v11.343.2

- `cd9321301` T-528 part 2: the dawn chorus, TULIKKO the fox, and the conjugate light (vision 4.40; the user, 2026-11-07, by multiple choice)
- `b0a673da8` T-528 (f): PLAY's SONGBOOK has a DUET slot -- shown, and listened for, only under the conjugate light (Aurora_ConjugateLight); played, it echoes on the instrument held with the other edition's part faint beneath it. Its tune is the user's, by ear, so the slot is empty and never shown (vision 4.40)
- `cfa815654` T-528 (f) early: Aurora_ConjugateLight() in daemons_aurora.h -- the book mended and a party daemon whose met game is the other edition

The design and tools since v11.343.2

- `ceda27aa` T-518: THE SUBTLE LAYER read aloud again for 'a USER's handbook' (617d0f13) -- one line new, the rest from the cache
- `1c0679c5` qa: T-528 part 2's companion half, the conjugate light in the den (C-306, companion 0671747)
- `8e660d76` T-528 part 2 built (engine cd9321301): the dawn chorus, TULIKKO the fox, the conjugate light -- tools/genchorus.py, tools/gentulikko.py, the route t528_aurora_b (nine stops passed), qa 7Nov2026 T528 40-47
- `f960e556` T-528 (f): the DUET slot in docs/play_songs.json (engine b0a673da8) -- its tune and the other edition's part empty, the user's to choose by ear
- `e0b64234` TODO T-528: the companion's half of part 1 is C-305
- `9b85d66d` qa: T-528's companion half, the aurora's nights in the den (C-305, companion 8dfdeee)
- `eda7ad9a` ROM release v11.343.2: T-528 the aurora part 1 (DAEMON TOWER, the grove skies on light nights, the night outdoors); PEWTER's SLATE darkened

The engine since v11.343.1

- `8eea1ac1b` healthbox_elements.png: re-encoded as genthrashicon writes it (pixel-identical; T-524's spliced sheet, so check_generators --writes sees no drift)
- `c99d084c2` T-528 part 1: the aurora -- over DAEMON TOWER every night once the book is mended, in a lit grove's battle sky on the light's nights, and outdoors on those nights once every grove found is lit (vision 4.40; the user, 2026-11-07, by multiple choice)
- `b551cbe20` T-527: SLATE's room in real slate greys -- benchmark_slate.pal was 197-255 in every colour, so the wall and the platforms barely showed in the new room (the user, 2026-11-07: darken it)

The design and tools since v11.343.1

- `427b353e` companion_export: T-528's two DEBUG rows -- EVERY GROVE LIT reads the 14 FLAG_*_GROVE_LIT (FOUND + 0x10); NIGHTS OF LIGHT left out (an EWRAM override, not save state)
- `152def01` engine.md and items.html regenerated (gbabudget, gbaitems): T-528's memory figures and T-526's item text
- `4944572e` T-528 part 1 built (engine c99d084c2): the aurora over DAEMON TOWER, in a lit grove's battle sky on the light's nights, and outdoors once every grove found is lit -- filmed (tools/routes/t528_aurora_a.json), qa 35-38
- `36b0480c` check_generators --writes really runs gbabattleui, gbaframes and gbapreviews now: each accepts --over-later-work (argparse refused it, exit 2 with no traceback, so their sandboxed writes never ran); gbacalendar_ui, port_item_text and gbaitemicons already took it
- `a8060570` T-527: SLATE's room darkened (engine b551cbe20) -- genbackdrops.py ramps SLATE by Lorelei's lightness over real slate greys in its roof's hue, since a tint that keeps HSV value left it 197-255 in every colour (the user, 2026-11-07: darken it)
- `26c5f1b2` T-528 part 1's rules in its row: the light's nights as arithmetic (a 16-bit hash of the night's day number, one in three) and the seven grove pairs, mainland to island, with a reason each
- `770fda1b` ROM release v11.343.1: T-527 the battle backgrounds in our own hand (A outdoors, B indoors); seals v11.342.x

- `d3f239d57` T-527: the battle backgrounds in our own hand -- A OUR PLACE outdoors, B QUIET FIELD indoors (the user, 2026-11-07: "A outdoors, B indoors")

The design and tools since v11.342.7

- `2abdf657` T-527 built (engine d3f239d57): the battle backgrounds in our own hand -- A outdoors, B indoors (the user, 2026-11-07)

The design bible's own entry for v11.343

v11.343 — 2026-11-07

- **4.40, the aurora: the dawn that comes at night (T-528, the user, by multiple choice; brought by the game lane).** Once the book is mended, the light hangs over DAEMON TOWER every night: CONTENT in oxygen's red line, CONTEXT in its green. On some nights (about one in three, picked from the date) it shows beyond the tower, spreading grove by grove, and each mainland grove lights its conjugate grove on the islands. The mainland is the north wind's side and the islands the south's, in both editions. The dawn chorus plays in the groves at dawn after a night of light; TULIKKO, an arctic fox, sweeps the sparks up at STILLFALL CAVE. With a daemon from the other edition in the party the sky shows both lines, green below and red above, and PLAY gains a duet. The names were checked: Galileo's 1619 "boreale aurora", the Sámi guovssahas (its "heard" gloss popular, not settled), the Māori Tahu-nui-a-rangi (kept out of the game), the Finnish revontulet.
- **4.40, the mended book's lens (T-529, the user, by multiple choice).** Once mended, every page of THE UNITY BOOK turns between its night, whole and dawn readings in place, the tone turning with it; L and R in the game, a three-way switch in the companion.
- **Open log**: the aurora, entered and decided the same day.
