v11.345 — 2026-11-08

- **9.34, the MUSAI branch keeps the seasons (T-532, the user, by multiple choice).** Each of the six MUSAI has four seasonal forms and wears the one `DaemonsSeason()` gives it -- CONTENT on the northern year, CONTEXT on the southern -- in battle, the party, the PC, the follower, the summary and the INDEX: a display swap, Unown's way (18 picture-only ids; summer is today's art), look only, silent, a battle keeping the season it began in. MASKMUSAI's home season is winter, LENSMUSAI's spring, CAREMUSAI's summer, SEEKMUSAI's autumn; the machines are part of each body, never ridden. 24 INDEX entries, one per form, both editions sharing them. **CRYPTOPHASIA**, CODEMUSAI's own at 30: a LOGIC special hit, 40 and +20 for each other MUSAI in the party still able to fight (to 140). The plumbing is built with placeholder art (copies of today's); the drawings follow. DRAFT words.

Patches

Apply one to the ROM it names, in any BPS patcher (Rom Patcher JS works in a browser). Each checks the ROM's CRC and refuses the wrong one. Step by step, with every checksum: `ROM RELEASE/HOW_TO_PATCH.md`.
