v11.311 — 2026-10-26

The second joining (T-457)

- *4.37 (the user)*: **after THE ANNEX, CRYSTAL takes up the network in THE MARGINS the player helped finish, and her INDEX joins CELIO's machine side by side, neither on top** -- *the inverse of Brazen's gold leaf.* **Seeded in Act 2, paid off after:** *a receiver on her desk picking up one daemon far away, two undated PROSPECTUS papers, Brazen's board without scores, the CHECKPOINT keepers listening to someone not in the room; she hands over the GLOBAL INDEX almost silently.* **SCORN unchanged, the gold never repainted, nobody rescued.** *The name of her work, the Act 2 seed and the words are open; the user is writing some of them.*

Patches

Apply one to the ROM it names, in any BPS patcher (Rom Patcher JS works in a browser). Each checks the ROM's CRC and refuses the wrong one. Step by step, with every checksum: `ROM RELEASE/HOW_TO_PATCH.md`.
