The engine since v11.342.1

- `a01ea9d67` T-452 arm C built (the user, 2026-11-06, "Build the good ones"): 28 daemons and 74 icons redrawn in FLUX.2 klein 4B + the pixel-art LoRA

The design and tools since v11.342.1

- `e74df6e0` nexus.md: LODESTAR, REFLECTION and BASTET left the painted set for the arm-C redraws (T-452, d30db4c3)
- `d30db4c3` T-452 arm C built (engine a01ea9d67): 28 daemons and 74 icons from the arm C drafts, on the user's "Build the good ones" (2026-11-06)
- `df143183` T-452: the redraws drafted in arm C -- the worst ten, batch 13 restyled, the ten mismatched backs, 95 icons (qa sheets 55-57)
- `58aa0a78` qa: the day's README for T-522's shots 52-54
- `f889fea8` T-522: the user's ear -- only the true voice is kept on the phone, the voices' generation, a play mark on the sprite, the name over the overlay (companion 19f6e14); three shots
- `1baa4d11` generator_drift.json: port_dialogue out (it no longer drifts: a whole-tree write refuses); its SaffronGym warning (T-503) moves into port_dialogue.py as a refusal
- `ef7c6373` port_states: skips the third book's files (daemons_hermetic.c, daemons_spellbook.c) -- THE AWAKENING is the book's first spell, not the sleep cure, and a write renamed it RESUME over T-519
- `436f1555` gbaowslots: a write keeps rows added below its variants (T-496's OBJ_EVENT_GFX_LIONESS_BALL) instead of deleting them (the tree was right, the tool stale)
- `ea21b6d2` gbanexusmap: learns T-519's LARK (engine 545de140f) -- her hide in EventScript_FirKeyFlags, EventScript_LarkAtFir and its words -- so a write no longer takes her out of THE NEXUS's scripts.inc and text.inc (the tree was right, the tool stale)
- `754f9aae` sprites.md: gbaspritecensus --write -- the doc was stale: three overworld people added (CALLOW, DOLDRUM, HALFTONE)
- `7ea09991` type-chart.html: gbachart --write -- the doc was stale: 382 moves now (ALIGN, OTHER)
- `c6ccb7b0` engine.md: gbabudget --write -- the doc was stale after T-519, T-452 and T-445 (ROM 11.1 MB, EWRAM 668 B free, 264 flags)
- `c6e59410` port_arcana: find the companion's arcana.json where it is cloned when the checkout has no link, so check_generators --writes' sandbox no longer crashes
- `cff1ea07` TODO: T-437 the SCREEN font's draft ROM, for the user to try
- `6b56b4bd` T-437 DRAFT: SCREEN built into a draft ROM (engine branch t437-screen-font c5e8280e3, not merged)
- `70c42116` T-452: spriteforge.py learns arm C -- --model klein4b, --lora NAME[:STRENGTH], --reference IMAGE (ReferenceLatent)
- `176f5828` TODO: T-452 the pixel-model trial's winner (klein 4B + pixel LoRA) and the user's yes to redraw in it

- `cac98652` T-452: pixel-model trial -- LODESTAR, ROVERCUB, ILLUMINED by four arms, reduced by the existing reducer (qa sheets 46-48)
- `1fcf7dc7` ROM release v11.342.1: only daemons drawn off the ground float in battle (T-452); v11.341.x sealed

The design bible's own entry for v11.342

v11.342 — 2026-11-06

- **4.2, the record is read and the telling is only heard (T-522, the user's design).** The tellings are approved as drafted. In the companion a card shows the INDEX entry, and LISTEN (a play mark in a cog) reads it in the device's voice: flat, robotic, a little glitchy. The daemon's own words are never printed: its sprite shimmers, and a tap brings the daemon forward over its card, in its type's den, to say it is thinking and then tell of itself in its own voice, its mouth moving, before it shrinks back (C-303).

Patches

Apply one to the ROM it names, in any BPS patcher (Rom Patcher JS works in a browser). Each checks the ROM's CRC and refuses the wrong one. Step by step, with every checksum: `ROM RELEASE/HOW_TO_PATCH.md`.
