DEBUG/daemonsContext_debug.gba	CONTEXT (testing build)	7fdcb29ab688fd2fb31d844b52df3b5a15b2056c

The engine since v11.298.1

- 2e4a96f2d T-395: the NEXUS residents -- eight new daemons in the unused slots OLD_UNOWN_C..J
- 2c64c15d0 T-397 (the user, 2026-10-09: "you always need one in your party"): the PORT and the DAY-CARE count a daemon asked for as gone, as SEND already does -- asking for one and then storing the other could have left the party empty at the next SYNC.

The design and tools since v11.298.1

- `1e77e815` T-395: REFLECTION is both the NEXUS wolf and the stone LYNX grows by, on purpose (the user, 2026-10-09)
- `c022db45` qa: the NEXUS residents' sheets (T-395)
- `d5e79f35` T-395: the NEXUS residents in the game (engine `2e4a96f2d`) -- `tools/gbanexus.py` writes the eight into the unused slots with their art, approved INDEX entries and OPUS's margins (DRAFT); their drawings also in `gfx/daemons/` beside everyone else's. `companion_export`, `reviewsheet` and the item animation learnt a slot's second name (REFLECTION is `OLD_UNOWN_C`), and the export drops INDEX numbers past the save's 416 flag bits. `still-vanilla.md` marked stale. Waiting on the user: REFLECTION is already the MOON STONE's name.
- `f9f4189c` T-395: the NEXUS residents' back sprites -- drawn from behind on `spriteforge`, cleaned to 64x64; the fronts approved by the user (`gfx/drafts/nexus/final64/README.md`)
- `a40600d8` qa: the home-screen widget (C-100)
- `710c98fa` T-395: the NEXUS residents drawn on `spriteforge` (`roverbyteseer`) and cleaned to 64x64 -- REFLECTION with its black mirror, LODESTAR, PERIHELION with its cosmos, LYUBOV out of her oval, MULTIMAL with a light within, ILLUMINED, LYNX, BASTET; every drawing with its seed and prompt (`gfx/drafts/nexus/final64/README.md`). DRAFT, for approval.
- `fca35a8b` qa: the M5GO draws CAREMUSAI (C-97)
- `fc3ad60` T-397 done (engine `2c64c15d0`): one daemon always stays in the party -- the PORT and the DAY-CARE count one asked for as gone; the companion keeps the same rule at SYNC
- `9bd062b4` qa: T-396's picture
- `ec645bbc` ROM release v11.298.1: any number of daemons AWAY, one to a device (T-396)

Patches

Apply one to the ROM it names, in any BPS patcher (Rom Patcher JS works in a browser). Each checks the ROM's CRC and refuses the wrong one. Step by step, with every checksum: `ROM RELEASE/HOW_TO_PATCH.md`.

The engine since v11.297.4

- 6bf720409 T-396 (the user, 2026-10-09): any number of daemons AWAY -- SEND no longer refuses a second one ("One at a time: X is with your device now." is gone, and DaemonsOtherOnDevice with it). The companion keeps one daemon to a device (its C-80). AnotherCanBattle now counts a daemon asked for as gone, since several can be asked for before a SYNC.

The design and tools since v11.297.4

- bf8c2bd8 T-396 done (engine 6bf720409): any number of daemons AWAY, one to a device -- bible v11.298, 9.25's "one daemon at a time" reversed (the user)
- 05c3b1a1 T-395: the NEXUS cast settled with the user -- REFLECTION, LODESTAR, PERIHELION, LYUBOV, MULTIMAL -> ILLUMINED, LYNX -> BASTET, with PHOENIX and PENGUIN; every resident drawn new, in paint (docs/nexus.md)
- 5d033acb T-395 redesigned with the user: THE NEXUS, through the singing fir (docs/nexus.md) -- the fir in every grove, flat until the key; the NEXUS made of paint, its trees doors to the groves found (grey and smudging before), one Christmas tree home, the GUARDIAN a voice at each door, THE (NOT A) HUNTER a bear in red plaid, and a proposed cast from THE PAINTED MIRROR (MULTIMAL, PHOENIX, the wolves, the deer, LYNX, PENGUIN, the tiger, the lioness). gbagrove.py takes a parent's own map id and a grove with no residents; spriteforge and the AI docs name roverbyteseer plainly (the user: never .local). The C-80 picture filed yesterday.
- beceae3 ROM release v11.297.4: a debug game that starts with nothing, and GAME EVENTS (T-394)

The design bible's own entry for v11.298

v11.298 — 2026-10-09

AWAY, any number (2026-10-09)

- 9.25, reversed (the user, T-396): SEND no longer refuses a second daemon. Any number may be AWAY, each in a device of its own; the companion keeps one daemon to one device, and choosing another device for a daemon moves it. SEND still refuses a daemon not in full health, and the last one here able to battle -- now counting one asked for as gone, since several can be asked for before a SYNC. "One at a time: X is with your device now." is gone from the game.
