

DAEMONS v11.282.x — release notes

Every release made while the design bible was v11.282, newest first. The ROMs beside this file are v11.282.2.

DAEMONS V11.282.2 — RELEASE NOTES

Released 2026-09-24 09:46 · built against the design bible v11.282

- **Engine:** CodeMusic/pokefirered-daemons 796e6cbaa (context-content)
- **Design:** CodeMusic/DAEMONS 19c51854

ROM	edition	SHA-1
daemonsContent.gba	CONTENT	c7d767dd8c696f245fa241afc4f406005ca7a096
daemonsContext.gba	CONTEXT	2ed2f1136900f17fb84b029a72a7325e920d40e1
DEBUG/daemonsContent_debug.gba	CONTENT (testing build)	61ec05b9b64c0078005dd5f039196048406ec91f
DEBUG/daemonsContext_debug.gba	CONTEXT (testing build)	d4ee2b8cd45038a17beed3af43e0c28d9510efa1

The engine since v11.282.1

- 796e6cbaa T-260: vanilla's GOLD TEETH is the WARDEN's TOKEN

The design and tools since v11.282.1

- 19c51854 T-10: proposed for a grove's tree rather than BRAZEN's approved maze
- 5798e734 T-261: 8.6's adopted-not-built list is partly stale; the triangle is a question
- 3149ed06 T-260: the WARDEN's TOKEN, logged and closed
- 62dc7e48 ROM release v11.282.1; v11.281.x sealed into one PDF

Patches

Apply one to the ROM it names, in any BPS patcher (Rom Patcher JS works in a browser). Each checks the ROM's CRC and refuses the wrong one.

patch	apply it to	that ROM's SHA-1

The engine since v11.281.3

- *nothing: the same engine commit as the release before*

The design and tools since v11.281.3

- fd63fc9b v11.282: a day of pushes, built
- 9e0a2946 T-221: where the groves could go, surveyed; four real lone trees, the rest to be planted
- 64dde2e ROM release v11.281.3: the INDEX's page, the readable stones, BPS patches

v11.282 — 2026-09-24

A day of pushes, built

- *OPUS's margins in two voices* (T-188): **REASON's** lines notice what you did, **INSTINCT's** what it was like — *six written twice, DRAFT; the debug kit carries OPUS.*
- *The send-out's colour flash, traced* (T-254): starting a fade copied the palette to the screen at once, past the drawing filter — *found with the theatre's new `pburst`, which dumps palette RAM beside every frame. `engine.md` trap 30.*
- *The unresolved display is a latent before it is decoded* (T-250): the same seed stopped eleven steps in, inside the finished draft's outline (`spriteforge.py --stop-at, gbaunresolved.py`).
- *HALFTONE Tower's stones are encased screens, and can be read* (T-249): a headstone's housing, a dark screen of green marks; six lines, each an epitaph and a deletion record, **DRAFT**.
- *L turns an Index entry to its workings* (T-189): the line from its root and its routines by level, from the ROM's own tables — *and SELECT's margin works on the family page's entries at last.*
- *A MEME is explained, once* (T-258): at the **CHECKPOINT**, caught from another daemon and passed on — *FireRed kept the check and never used it. Memetics drafted for INIT, his house and a MANSION log.*
- *The INDEX writes a page about you* (T-257): **CRYSTAL**, home after the payload, lets it write; **LAB NOTES** keeps **WHAT YOU CHOSE**, rebuilt from the save — *its words PLACEHOLDERS until approved.*
- *ROM releases* (T-259): `tools/romrelease.py` files each build by version, seals a superseded version into one PDF, and makes BPS patches for all four retail ROMs (`tools/bps.py`) — *ROMs and patches never in git; `ROM RELEASE/WHERES_THE_ROMS.md` says why.*
- *Where the groves could go* (T-221): four real lone trees found; the rest to be planted, the user's to place.
