- 634696e9 v11.285: The Programmer's Guide to the Human Mind, found on the islands (4.36)
- d1a538f7 Claim T-300..T-311: the Programmer's Guide in the game, and what reading it suggested
- 0821a509 ROM release v11.284.1: day and night, reading in battle, the STREAM badge; v11.283.x sealed

v11.285 — 2026-09-25

The Programmer's Guide to the Human Mind, found

- *The user's own book, recovered from `docs/archive/`, is in the game (4.36, T-300–T-303): a key item, **GUIDE**, on the bookshelf in ONE ISLAND's second house — the islands' direction (0.6) as one volume, found and never handed over, because 4.3 says method is what survives a handoff. Its cover first, then **CONTENTS** — the sections on the left page, their chapters on the right — then each chapter across the spread, in the TEXTBOOK's reader with its own colours and its own cover, drawn from the PDF's. 137 pages became 28 entries of about a hundred words, printed under four rules — about people; only ever "like"; the process, never the pathology; no substance named — which `tools/genguide.py` checks word by word. Every word is DRAFT until the user approves it.*
- *Two cuts made writing it: the seven centres' colours (beside Chapter 9's wrath and envy they tie a colour to a feeling, craft rule 1's one absolute) and the glossary's "proto-consciousness" (it asserts the machine half).*
- ***Lineage.md** 3c: the Guide is a primary source for the thesis — Chapter 3 is "Emotions as Contextual Information", Chapter 11 has thoughts as data and feelings as the context that changes how it is read — and eight things the game already had are in it, from the REMNANT's loop to the ROOTBOX's root access.*
- *What reading it opened, each the user's to rule on (T-304–T-311; T-305–T-308 turned out to be the clock session's T-269–T-272, logged minutes earlier, and are closed onto them): understandings written into its margins; its seven-day table for the day-of-week banner (MONDAY's orange 17.3 from ENTROPY); the brain and the tabs the user asked for on the USER card, both meeting T-252's "never counted"; a dream sign in the unread cave; the case studies as islanders; the REVIEW BOARD's copy with its ethics cut out.*
- *And one housekeeping rule: two sessions cannot both take "the next id", so `TODO.md` can reserve a block in one line and `check_lexicon` reads it — T-267 to T-299 for the clock session, T-300 up for this.*
