- `40024db6` ai/: the companion's part of the local cloud moved to daemons-companion seer/ (companion C-340) -- the Tiiny's voice stream, sleep sounds, Whisper, and n8n's daemon/talk and daemon/hear with make_workflows.py; their READMEs and CLAUDE.md point there. ai/ keeps the AI-play harness, its LiteLLM notes and its own workflows

- `459607fe` T-544: releases bring the docs current from WHAT'S NEW -- tools/releasedocs.py lists what came since the last release (DAEMONS: the release record's commits; the companion: since the WHAT'S NEW build before the newest) and checks every README, wiki, manual and SET UP page against it; book audio regenerated on a major or minor release only (--audio-gate); the push routine's step 5
- `42f60b4a` ROM release v11.349.1: the MUSAI followers, all 24 seasonal looks (T-534) and the third book's three covers (T-519); v11.348.x sealed (DRAFT)
