

DAEMONS v11.296.x — release notes

Every release made while the design bible was v11.296, newest first. The ROMs beside this file are v11.296.3.

DAEMONS V11.296.3 — RELEASE NOTES

Released 2026-10-08 08:13 · built against the design bible v11.296

- **Engine:** CodeMusic/pokefirered-daemons 154ef86f6 (context-content)
- **Design:** CodeMusic/DAEMONS 95caf6e0

ROM	edition	SHA-1
daemonsContent.gba	CONTENT	eb1a346c0e7100992360d2bafb1055dbbaa056e6
daemonsContext.gba	CONTEXT	a3f8f513f5163fe9caf2e4ea7bbdbfbc58e66ec
DEBUG/daemonsContent_debug.gba	CONTENT (testing build)	9f583e975270174f769d0f5951cf41e9486e0786
DEBUG/daemonsContext_debug.gba	CONTEXT (testing build)	89b3f585928a7ea64f5d2616b47dedb0bd51c903

The engine since v11.296.2

- 154ef86f6 T-387: GOTO is not a bird -- the player comes apart into the splash's 0s and 1s, a ribbon of its notes comes down a swoop of its own (a parabola from above the corner, with a travelling wave along it), and the code goes off with the music; arriving, the ribbon brings the code down and it flickers back into the player

The design and tools since v11.296.2

- 95caf6e0 T-387 done: GOTO is not a bird -- the player comes apart into code and goes with the music, along a swoop of its own (engine 154ef86f6)
- 8ecf3fd2 T-386 done: the field-test route plays on the release ROM -- 18 of 19 in one run, and the grove (flaky on Route 2's ledges) passes alone
- 3030a03d T-386: the release field-test route plays all 19 stops -- the walker goes around a scene's trigger when there is another way (CINNABAR's locked gym door and the Reading Room's doorway re-planned through themselves forever), the Reading Room's door is met by stepping up from the door, the museum's scene var is set after GOTO lands, and a route that loads its own ROM is checked against the build after the load
- 30659000 T-386: the release field-test route (19 stops, each back to BLANCHE by loadstate, GOTO to its town, walk in) -- 14 of its first 16 stops passed on the release ROM; continue waits out the recap, GOTO plays out an arrival scene, the START menu is read until it is built. The rest waits on the theatre being started again (the disk filled and its mGBA closed)
- 1720bf76 qa: a release route gets about by GOTO (T-384, T-386)
- 26fa7340 T-386: the theatre swaps ROMs and continues games with no click -- load debug|release, continue (by gMain.callback2, not frame counts), save in the game (START's two columns steered); the DEBUG build saved at PALLET, the release ROM continued there, and a release route's goto flew to VERMILION and fly to CELADON (0 stops failed)
- 7961116c T-386, the groundwork: the theatre script can load another ROM (emu:loadFile, its save, a reset), reset, and save or load a moment; a route can savestate NAME and loadstate NAME -- so a release route needs no click in the theatre's window. Written, not yet run: the running script must be reloaded once
- 9bcca740 T-384: a route gets about by GOTO on the ROM players get -- fly MAP_FOLDER plays GOTO as a player does (START, DAEMON, a daemon, GOTO, the region map's cursor read from RAM and steered to the town's cell from the ROM's own table), and a release route's goto flies; played in the theatre to four towns and refused cleanly indoors. T-386 filed: a release copy of the field-test route. engine.md: a flight moves gSaveBlock1 too
- e54a4794 qa: FLARE's WHAT REMOTE IS THIS and the scrolling lists
- 49406952 ai/n8n daemon/talk: 'local' means only local -- a failed local turn falls back to OpenRouter only when the companion asked for auto (pushed live)
- e5bcc41f qa: LONGWAVE's FIND IT on the CC1101
- 52971cca qa: the CC1101's low-battery warning (C-63)
- f9d903af qa: LONGWAVE's WHAT'S ON THE AIR on the CC1101
- fe6f8889 ai/n8n daemon/talk: the goal's one next step, told to the model only when asked about it (never nags), and markdown stripped from what is

spoken; pushed live to the internal n8n (companion C-64, C-66)

- 242a272c qa: the CC1101 talking (C-66) and WI-FI MOTION (C-70)
- bfd73461 qa: T-385, the GUIDE's day line before and after (v11.296.2)
- 2c144237 ROM release v11.296.2: the GUIDE follows the Xenith week (T-385)

Patches

Apply one to the ROM it names, in any BPS patcher (Rom Patcher JS works in a browser). Each checks the ROM's CRC and refuses the wrong one. Step by step, with every checksum: ROM RELEASE/HOW_TO_PATCH.md .

The engine since v11.296.1

- 547ed6aec T-385: the GUIDE's SECURITY page follows the Xenith week -- SUN chastity against lust ... THU forgiveness against wrath, FRI kindness against envy, SAT humility against pride (genguide.py from docs/guide.md)

The design and tools since v11.296.1

- [a322921b](#) ai/README: points at the companion's voice -- n8n/ and stt/
- [ec6615c3](#) qa: the CC1101 running the companion's refactored firmware -- GAME ROUTINES, the battery and the DAY screen (companion C-68, C-63, C-73)
- [1548f328](#) T-385 done (engine 547ed6aec): the GUIDE follows the Xenith week -- docs/guide.md and the ROM's SECURITY page
- [c4faf039](#) companion_export: routines.json -- the game's move and type names, for the companion's GAME ROUTINES (companion C-68)
- [0611343c](#) T-385 answered: the GUIDE follows the Xenith week (to build in the day's release)
- [db4a9579](#) T-385 filed: the GUIDE's day table and the user's Xenith week disagree -- waits on the user
- [188b1300](#) ai: daemon/hear (speech to text alone, internal + relay); make_workflows.py writes the companion's workflows from one place; push.py tags every one daemons; the speech server on port 8770 (8000 is taken on roverbyteseer) -- companion C-83
- [c53f5ad8](#) ai/stt: an MLX Whisper speech-to-text server for roverbyteseer (OpenAI-compatible, port 8000) with its install and launch agent -- companion C-83
- [b2a33a71](#) companion_export: the user's Xenith week (Chastity cures Lust ... Humility cures Pride), companion C-73
- [c8d197fc](#) ai/n8n: push.py imports a workflow onto either n8n and switches it on; daemon/talk is live on both, asking LM Studio for gemma-3-4b by name (nothing stays loaded there) -- a spoken local turn about 14 s, a text turn through the public relay 1.3 s
- [a9cb752e](#) ai/n8n: daemon/talk -- the companion's push to talk (speech to text, the carried daemon in character on the local model or OpenRouter, the INDEX voice), internal and public relay (companion C-64, C-66)
- [c54f8dcc](#) companion_export: the Xenith week (the Guide's virtue over shadow, and the user's theme words, companion C-73) in place of RoverRadio's older table
- [258ed9a8](#) qa: AWAY end to end (work-day run item 4)
- [10fe71b3](#) T-378 closed: four routes played (scenes, t383, stillfall, field-test from stop 2); T-384 filed -- GOTO on the release ROM
- [1fe2e6fe](#) The walker crossed STILLFALL B1F's ice in the theatre -- ten moves, every slide stopping where the plan said (tools/routes/stillfall.json)
- [213b93dc](#) T-383: seen in the game
- [8624ab49](#) T-383 seen in the game (tools/routes/t383.json); T-378: a debug route wins any battle the walker meets, win takes a turn (A on DETACH)

never ends one), finish plays out a running script, says reads curly quotes as straight

- 9167f707 T-378: field-test.json passes stop by stop (2-18) -- the museum's fee marked paid, the museum left by its mat's middle, the Reading Room's door stepped onto once
- 95177098 T-367 closed (all seen but the NOTEBOOK pages, which wait on approval); T-378: music waits for a warp's song to settle; field-test.json -- the Reading Room's door and its inside as two stops, 1F's placard dropped in exam season; tools/routes/t383.json
- e3aff7af T-378: the runner refuses a theatre running another build (the song table in the emulator against the built ROM -- a text-only rebuild moved ROM addresses, so every music check read the wrong song), and never stands on a door to read the sign beside it
- db4b6f72 qa: v11.296.1's pictures -- T-383's lines, PHLEGMATIC and SCORN (T-321), SLATE's MARK (T-346)
- be8961cf ROM release v11.296.1: T-383 (three lines the status sweep broke); seals v11.295.x

The engine since v11.295.7

- 14ac74e70 T-383 (DRAFT): three lines the status sweep broke --
PHLEGMATIC's 'deep-freeze' is ice again (it said 'deep-hang'), the ice room's 'once they hang.' (it said 'hung solid'), Route 25's 'starts thrashing' (it said 'gets thrashing')

The design and tools since v11.295.7

- **b94c7d25** T-383 struck (engine 14ac74e70, DRAFT); T-378 played: scenes.json passes -- the seven leaders' MARK lines (T-346 seen), PHLEGMATIC and SCORN (T-321 seen); the runner waits out a warp the music fade holds, and plays out whoever sees the player land
- **8d5e0894** T-378, first live run: the walker finds a .map symbol with no '=' (gStringVar4); the runner reads gen 3's control codes by their real argument counts, and captions a message once, not on every frame
- **02526d10** T-378: trigger (a scene stepped into, its battles won on a debug route) and trainer steps; --check refuses a goto into a wall; tools/routes/scenes.json -- the seven leaders' MARK lines (T-346) and PHLEGMATIC's and SCORN's scenes (T-321), each checked by its words
- **d170c6c6** The walker plans across ice (goal item 3): a step onto MB_ICE lands where the slide stops, cracked ice is a wall, and it waits out a slide; STILLFALL B1F solved on paper, not yet walked
- **1c946862** T-378 (built, not yet played): tools/theatre_route.py plays a route file stop by stop -- goto, talk, look, says, music, flags ... -- with a contact sheet per stop; tools/routes/field-test.json is the field page's route; the walker's flag() is a function now
- **857dc3d8** engine.md 5: the walker (tools/theatre_walk.py) -- its commands, what it handles, what it cannot; CLAUDE.md's tool list gains it
- **68ae87d7** T-377: check_reach finds a name printed before it is looked up (engine.md trap 43)
- **28131bf8** T-379-T-382 drafted for approval (field page q-push57); reviewsheet draws a tileset that borrows another's graphics
- **40b5d419** v11.296: the quest's two halves, MARKS and ROOTS (bible 0.7); T-379-T-382 drafted as tickets
- **4fff3a9d** T-377 (a name used before it is looked up) and T-378 (the walker as a route runner), for the 6 October work-day run
- **17c21746** T-321: CAIRN's gift and the Owl's thermostat scene seen; the walker can read and set a flag on a scratch save
- **ff0f6a63** ROM release v11.295.7: VERA's tending reads right (T-376)

The quest's two halves: MARKS and ROOTS (2026-10-06)

- **0.7, new (the user's decision):** the MARKS give intelligence, the ROOTS give understanding, and the user's sentence "Intelligence without understanding is artificial" (*Seeing Sharp*, 5 October 2026) is the spine of both halves -- never said in the game. ROOTS (chosen over GROUNDING, BEARINGS and leaving it unnamed) is a name, never a count: one label on the USER card's brain, opposite BENCHMARKS. The world shows the difference instead, in three DRAFTS for the user's approval: the borrowed daemon (its refusals), CORPUS's plastic plants against the CHECKPOINTS' real ones, and a fact collector with every MARK. Tickets T-379--T-382; nothing built yet.
- **Lineage.md 7.3** gains the article.
