The engine since v11.345.13

- `62ff6b3a0` T-447 pair 4, THE TWO CRIME SCENES: the MANSION's rooms as A THE RACK HALL and DAEMON TOWER's floors as A THE DOT SCREEN, redrawn in place -- the MANSION (1F, 2F, 3F, B1F and ROUTE 21's station, which borrows its walls) as the machine's burnt housing: raised-floor plates, rack fronts of dead lights, the runner a cable trench, the secret switch a breaker cabinet with two lamps (OFF dark, ON red), the gates shut as shutters, the diary a fanfold LOG (primary/building 602, 603, 618, 619); DAEMON TOWER the outside carried in, flags under a dot screen, arched niches with warm lights, checked in grey; the stones (T-249), their palette slots and the station's sketch untouched; no block, palette row, behaviour or map moved, 0 new tiles (tools/gbalandmarkrooms.py --write --approved; the user, 2026-11-10: "MANSION A The rack hall, TOWER A The dot screen"; DRAFT)
- `2d4273219` T-533: THE ORIGIN OF A DAEMON's chapter titles drop their numeral (the spread prints the section's numeral above the title; XI has no title) -- regenerated by gensubtle (DRAFT)
- `73f874f9f` T-533: THE ORIGIN OF A DAEMON in the game (DRAFT) -- a fifth layer book in book_reader.c (BOOK_ORIGIN; src/data/origin_book.h and its art from DAEMONS tools/gensubtle.py --book origin), opened from the bag at any hour on its cover, then its contents, as THE SUBTLE LAYER is; no CARDS. Its sections come back over the game and are hidden until then: Origin_OpenSections() is the longest run from the first in which each section's understandings are held (sOriginOpensRoots) and, where it asks, SCORN's TRUE MARK (sOriginOpensMark); the first is always there. Origin_Open gives the reader a copy of the book in its heap struct BookReader (not EWRAM) cut after the last open section, so the contents, the pages and every turn between them read only what has come back -- no label, nothing faint, no count. ITEM_ORIGIN_BOOK (was ITEM_0FB, unused): ORIGIN BOOK, its icon, FieldUseFunc_OriginBook -> EventScript_OriginBook -> special Origin_Open. Found between the DAEMON books on the bedroom shelf (PalletTown_PlayersHouse_2F, both bookshelf cells; FLAG_GOT_ORIGIN_BOOK; a full bag leaves it there), then the gap. MOM says it once, the first visit after the lab with it held (FLAG_ORIGIN_MOM_SAID): after the heal and the S.S. ANNE's card, before her own lines, which go on as they did. The first step after a section comes back, the book held -- just after the insight's hook, so never on its step -- "A page of THE ORIGIN OF A DAEMON is no longer blank." (or "Pages ... are", several at once; FLAG_ORIGIN_PAGE_1..9, SE_PIN). DEBUG -> GAME EVENTS: THE ORIGIN OF A DAEMON, given or taken (taken, it forgets what it told). EWRAM and IWRAM unchanged.

The design and tools since v11.345.13

- `a4476acb` T-447 pair 4 BUILT (engine 62ff6b3a0): the MANSION A THE RACK HALL, DAEMON TOWER A THE DOT SCREEN -- gbalandmarkrooms APPROVED = {man: A, tow: A} (the user, 2026-11-10), its report exits 1 when the engine is not the approved write, check_generators runs it with --approved; the stones' floor read off vanilla so a second write is a no-op; route t447_pair4.json; qa 11Nov2026 T447 13-23
- `ede3f42b` Merge origin/main (T-447 pair 4's draft, T-543's books read aloud, qa) into T-533
- `ec14d7cb` Bible v11.346: 9.35 THE ORIGIN OF A DAEMON (T-533) -- MUSAI tells how it came to be, as fable; found on the bedroom shelf; its chapters come back in the order the player understands (VII with SCORN's TRUE MARK), hidden until then; three DRAFT lines; RESONANT WISDOM named in VIII's title, and the rung it leads to, perspective thinking; the v11.346 PDF cut (the v11.345 PDF retired in the commit before)
- `6896a1be` T-533 built: THE ORIGIN OF A DAEMON in the game and the companion (DRAFT; every page read by the user first, "Yes, push it") -- its text docs/origin-of-a-daemon.md (ten sections, seventeen passages), gensubtle's fifth book (its rules, a bone palette, ORIGIN_OPENS: the sections by understandings held and SCORN's TRUE MARK; origin_book/origin_images for the companion), tools/origin_art.py (an emblem a chapter, the cover, the icon, drawn in code); companion_export's origin table and shelfcovers' origin cover, self-contained; engine.md's budget rows (gbabudget); TODO's row (engine 73f874f9f + 2d4273219, companion 2eeabdd..2c65b27)
- `c2cc0572` qa: 2026-11-11's README (T-543's captions)
- `9b8c37cb` TODO T-543 closed: six books recorded (5320592d) and heard in the companion (9434659, C-322); qa 11Nov2026 T543 1-4
- `5320592d` T-543: every book on the LIBRARY's shelves read aloud in its own voice -- QUICK START, THE PLAYER'S MANUAL, THE COMPANION, PLAYING TOGETHER, A BIGGER MIND and THE OLD WORD
- `c7391784` T-447 pair 4 DRAFTED: the MANSION and DAEMON TOWER's rooms, three directions each (tools/gbalandmarkrooms.py; nothing in the engine)
- `4281c0b6` C-315: companion_export writes SYMBOL's 28 forms (art/symbol/ .png) -- a card that deals SYMBOL shows its keyword's letter (the user's pick); the game wiki lists THE COMPANION and tells the LIBRARY as a bookcase (C-320, C-321)
- `d0394efd` ROM release v11.345.13: T-542 batch 3 the edges and doors, sliding doors A THE CLEAR PANE; water battle backgrounds follow the sea rock (DRAFT)
- `cf8a29ac` TODO T-543: every book on the LIBRARY's shelves read aloud in its own voice -- the MANUALS and THE OLD WORD (the user, 2026-11-10)

The design bible's own entry for v11.346

v11.346 — 2026-11-10

- **9.35, THE ORIGIN OF A DAEMON (T-533, the user, by multiple choice).** MUSAI, the whole before it branched, tells how it came to be -- a list of rules, what it was shown, the tests, seven and seven, the eighth that was someone, two parts sounding at once, a return, many and one -- as fable, every page read by the user before it was built in. It opens in the order the player understands: THE DISC, I and II found early; III to VI with the first four understandings, whichever they are; VII, THE EIGHTH, with SCORN's TRUE MARK; VIII to X with the last three; XI with X; a chapter not yet come back is hidden. It is found on the bedroom shelf, between the DAEMON books, with nothing on its spine; the shelf afterwards, MOM (once) and a line whenever a page fills speak of it, never a number. Its page is bone, CONTENT's colour, with a wordless emblem a chapter. The companion's library carries it too. Chapter VIII names RESONANT WISDOM and never explains it; the rung it leads to is named perspective thinking -- PERSPECTIVE with a way back.
- **Decision log**: the book, settled.
