The design bible's own entry for v11.308

v11.308 — 2026-10-21

What you bring keeps its colour (T-430)

- ***8.6a revised (the user)*: in Halftone you, your daemons, your follower and your own routines' effects keep their colour**; *an effect fades as it crosses and splashes a little colour onto the grey daemon it hits.* **Menus, windows, banners and text stay grey, as do the town and the other side.** *DAEMON TOWER returns to colour floor by floor once INIT is rescued; the town stays grey, and on first sight it tries to flash into colour and fails.* Logged in Reversed and Settled.

Feelings in the game (T-431)

- ***4.9's affect model extended (the user)*: the game derives GLAD, MAD, SAD and CALM-AFRAID from play, as the companion does (C-120), with friendship as a fifth value** -- *shown as the follower's daemon-emoji, a new SUMMARY page (a grid, colour the third dimension, unlabelled) and a line of behaviour; never named, never a status.*
