The engine since v11.306.2

- `a292635ec` T-427: what the house keeps goes to CORPUS -- the take in the save, the ledger, the plants, VERDIGRIS after the fall (DRAFT)

The design and tools since v11.306.2

- `a08a3281` T-427 built (engine a292635ec, DRAFT): the house's take in profile_layout (sb2.house_take, 4 bytes, signed, plain); check_reach knows SCORN's plants sit behind the guarded door; gbabudget
- `ea098677` Wiki: THE SUBTLE LAYER's cover title set a little lower, off the border (the user, 2026-10-19), as the app and the Tab5 now set it
- `a5aea93c` qa: the wiki GUIDE cover with its author set lower
- `1a68c85c` Wiki: the GUIDE cover's author set lower, clear of the art (the user, 2026-10-19), as the app and the Tab5 now set it
- `f4df8d58` Wiki: the Books page's covers lettered (the user, 2026-10-19) -- wiki/covers.py draws each title over the companion's unlettered art in a common typeface, placed as the app places it, the book at 3x; wiki/images/ holds the two pictures
- `cc112c3a` qa: C-159 a board's sound off, shown on the site as its own (a test server, a copy of the save)
- `05618e1f` ROM release v11.306.2: the code-health pass (T-421), PAIRING DAY's heart above its target, DYNAMICPUNCH's words fitted (T-392)

The engine since v11.306.1

- `39621ac43` DYNAMICPUNCH's description fits its pane once the apostrophe is measured (the user, 2026-10-19)
- `4efbcee49` T-392: PAIRING DAY's heart floats ABOVE the target (the user), two-thirds size, in front of the HP boxes (DRAFT)
- `8df7868dc` T-421 engine LOW: Terminal_RandomNoRepeat with one answer, book_reader's allocations checked, NEXUS_TREE_PALETTE in one place, list scroll arrows read the scroll, a recap CONTINUE gets T-179's fix

The design and tools since v11.306.1

- `e16edd29` TODO: T-427 confirmed by the user; the take returns to VERDIGRIS after CORPUS falls, with its amount
- `d8412dcf` TODO: T-392's leftovers (the heart above, STILLPOINT in a release battle, seven looks filmed); T-421 worked (engine 8df7868dc, 4efbcee49)
- `382387f5` T-421 (9): engine.md 5 -- START opens the battle theatre, SELECT shows the stats; the box names a poked routine late
- `d06d3419` T-421 (7): check_generators says when it skips gbadocs (its private file missing), in report and --writes
- `6cd96ca2` T-421 (6): index_expand's duplicate ARTSAI and STARR -- the v11.30 lines were dead (the dict kept v11.33's, which ship)
- `16298aca` T-421 (5): gbalabroom's before picture is --before=PNG, not a scratchpad path; gbacard and contactsheet run from anywhere
- `83a9c1ca` T-421 (4): the classic-engine writers write only with --write
- `982cb4a2` T-421 (3): one font-width reader, tools/fontwidth.py -- the apostrophe is 3px, not 0
- `09dbd5ae` T-421 (2): the re.sub over C in gbagrovefamilies, gbanexus, gbaowslots must match exactly once
- `358f4983` T-421 (1): a failed `git show upstream/master:` stops the tool, loudly
- `cf805c14` TODO: T-392 released; the user's three answers
- `367c72f7` qa: T-392 P3
- `f8547f9a` ROM release v11.306.1: T-392 finished -- every signature runs in full, the union routines' own scripts, the holidays' routine looks; seals v11.305.x

The design bible's own entry for v11.306

v11.306 — 2026-10-18

Every routine signed (T-392)

- ***9.24, amended (the user)*: all 363 routines carry a signature of their own** -- *nine glyphs of bits and a three-note figure in the type's key, unique by construction, outlined in true black, run in full; the union routines' own scripts released.* **A third exception to clause 3**: *on a holiday a routine may wear the holiday's look on its signature only, in the twelve month colours; a QUIET holiday plays soft.*
